DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

“Oil” is an extremely broad term. Applicant does not teach what oils are useful in the instant process or given guidance on how to select an appropriate oil that would be effective in the instant process. Considering the vast number of substances that are considered “oils” it would require undue experimentation to make and use the invention as claimed.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The intended scope is unclear and thus the claims indefinite because "Oil" is an extremely broad term. Applicant does not teach what oils are useful in the instant process or given guidance on how to select an appropriate oil that would be effective in the instant process.

It would appear that claim 1 and most of its dependents are missing an essential embedding step. It would appear that applicant fails to particularly point out and distinctly claim the subject matter which applicant regards as the invention by not claiming an essential step.

Please note that the language of a claim must make it clear what subject matter the claim encompasses to adequately delineate its "metes and bounds". See, e.g., the following decisions: *In re Hammack*, 427 F.2d. 1378, 1382, 166 USPQ 204, 208 (CCPA 1970); *In re Venezia* 530 F.2d. 956, 958, 189 USPQ 149, 151 (CCPA 1976); *In re Goffe*, 526 F.2d. 1393, 1397, 188 USPQ 131, 135 (CCPA 1975); *In re Watson*, 517 F.2d. 465, 477, 186 USPQ 11, 20 (CCPA 1975); *In re Knowlton* 481 F.2d. 1357, 1366, 178 USPQ 486, 492 (CCPA 1973).

The phrase "without melting the tissue cores" is confusing as it is unclear if the phrase is simply redundant or if there is more to the invention. The confusion lies in

the fact that the method already calls for the array to be at a temperature below its freezing point.
